

TOMÁS

MARGIOTTIELLO

FRONTEND SOFTWARE ENGINEER

TomasMR99@gmail.com

My cellphone: +541133470410

Buenos Aires, Argentina

Mi name is Tomás. I am 26 years old and am currently studying information systems engineering at the UTN regional Buenos Aires, taking fifth year courses. Additionally, I complement my knowledge with online courses and self-learning.

I consider myself responsible, capable of working in a team and/or individually, proactive and open to new challenges. My knowledge covers both back-end and front-end development, but I am currently focusing on the latter.

At the moment, I am working as a front-end developer in a multidisciplinary team, using agile methodologies, performing code maintenance and developing new features.

Skills	Front-end	Back-end	Language
	I trained myself through courses and self-study in web development, in addition to the constant challenges in my current job.	Knowledge of different programming paradigms, design patterns and databases.	I studied English at a cultural institute, successfully passing the First Certificate exam in 2017.

Technologies	ReactJS	npm	Spark
	HTML5	Bootstrap	SQL / Transact SQL
	Javascript / Typescript	Java 8	Git
	CSS / SASS	Maven	C/C++

Work experience	Developer Intern Gilbarco Veeder Root	Jun. 2023 - Aug. 2024
	I was a developer/QA intern. Scrum. Python. Automation testing.	
	Junior Front-end developer Global Logic	Aug. 2024 - Today
	Development of new features in the front-end team. Code maintenance and test cases. ReactJS. Typescript.	

Education	Universidad Tecnológica Nacional Information Systems Engineering	2018 - Today
	Currently in 5th year with a grade point average of 8,2. I have passed 32/43 subjects with 6 pending finals.	
	CoderHouse ReactJS front-end development	2022
	Web Development Course. Final Proyect Javascript Course. Final Proyect ReactJS Course. Final Proyect	
	Villa del Parque English cultural institute British English	2006 - 2017
	First Certificate exam - dec 2017 - 168/190 - B2.	

Hobbies	In my free time, I like learning about new technologies, improve my front-end skills and knowledges and research tools and YouTube channels that may be useful and interesting. Also, I love travelling and computer games
